E-mail: ecovillage.bunyonyi@gmail.com

LANGUAGES

English, Rukiga

VOLUNTEERS

YES—one week or more
Accommodation is provided by the villagers in the Lake Bunyonyi Eco-Village.
Volunteers will have to pay for their transport to Kabale as well as their food.
Volunteers will be expected to help the Community by teaching English, swimming and participate in some light gardening work.

THE LIBRARY

The library is located on the most beautiful lake in Uganda - lake Bunyonyi.
We started building it in January 2019 and we hope that it will encourage the children and the rest of the community from the surrounding areas to read more and attend school despite of the challenged caused by their location. The transportation around the lake is mainly done by foot, canoes or little boats. The library is expected to assist a community of around 4000 people - the five primary schools and two secondary schools located nearby will greatly benefit from it.

THE COMMUNITY

Lake Bunyonyi Eco-Village is an organization registered with the Uganda government since 2011. Since then it has supported more than 80 orphans by giving them access to education, providing them with food and basic hygiene materials. Their main mission also includes eco-tourism and environmental preservation.

The organization's co-founder Isaac has been a driving force in the realization of this Bookfeeding project and we are very happy to see it turn into a reality.
